Subject: RE: Warm Springs

Thank you. I understand that the Tribe has drinking water problems and is subject to 2 SDWA compliance orders. But it would be helpful for me to know the status of compliance with the CWA and in particular the 2 CWA AOCs from 2013 (CWA-10-2013-0048; CWA-10-2013-0050). If possible, could you provide me with the following information?

- Did the Tribe comply with the training and maintenance plan requirements under the AOCs?
- Did the Tribe achieve compliance with the effluent limits and monitoring and reporting requirements in their permits by 12/31/13 as required by the AOC? If not, did the Tribe provide us with a notice explaining why compliance was not possible?
- Did the Tribe undertake the equipment repairs, replacement and installation work as required by the AOC in CWA-10-2013-0050?
- Since issuance of the AOCs, has there been 6 consecutive months of no discharge exceedances under either permit?
- Have there been violations of the permits since issuance of the AOCs? If so, will EPA be taking any further action?

Thank you, Richard

Hi Richard. I've not been involved for many years. But I heard enough to say they are most probably not in compliance with the AOCs. I spoke to the new person working with them: Ray Andrews. Ray says they have a lot of problems but focusing on drinking water vs NPDES. I'm copying Ray on this message.

Subject: Warm Springs

Hi John,

I am working on RCRA and CERCLA matters for a couple of landfills and some transfer stations on the Warm Springs Reservation and there is a briefing of the RA set for Wednesday afternoon on those matters. I see that there are a couple of CWA administrative orders on consent from 2013 for wastewater discharges and I am wondering if you could let me know the status of compliance under those AOCs?

Thank you, Richard
